## About Simplifai

Simplifai offers an end-to-end intelligent process automation software that can understand written human communication and take action. By interpreting free-text in chat, emails, documents, CRM systems, portals, and more, and can perform actions in any systems using API or RPA. We offer customizable standardized, out-of-the-box AI-solutions.

With a modular approach on our products; Emailbot, Chatbot, Documentbot, and our main concept Digital Employees we help businesses grow, cut costs, and gain a competitive advantage.

- Standardized solutions
- Best-in-class automation grade
- Easy implementation
- Quick return on investment

# BECOME A SIMPLIFAI PARTNER

Our AI-solutions, in the form of Digital Employees can automate work processes by combining modules like Emailbot, Documentbot, Chatbot with rules and integration and perform tasks that only humans could do in the past.

Digital Employees assist and work side by side with their human colleagues, and can work in different departments like customer support, case handling, IT and HR.

**Digital Employees** are AI-solutions that can understand human communication using Natural Language Processing.

**Simplifai Studio** makes it simple for organizations to assemble, train and monitor their Digital Employees, and the platform makes it simple to achieve end-to-end automation with just a few clicks.

Simplifai has a great track record of archiving high automation grade even with limited time and amount of training data

**Emailbot** is an AI solution designed to automatically handle large volumes of emails via Intelligent Process Automation. It can read emails, interpreting their content, classifying them and executes tasks in your systems.

**Documentbot** is an AI solution that can process various documents from different sources such as email attachments, email uploads, and online folders. It can classify documents, extract information, forward to stakeholders and keep back-end systems updated.

**Chatbot** is an AI solution that works as an online communication platform designed to send immediate responses to enquiries. Available 24/7, Chatbot replies instantly and saves time for users by promptly fetching information.

## Our products are available on various Marketplaces
